15 Description of Equipment or Protective System

The TX6845 Group I LED Indicator is designed to be mounted into a panel and will illuminate when powered from an external source.

It comprises an enclosure into which is mounted a printed circuit board containing a resistor and a light emitting diode. The enclosure is formed in two parts, a polycarbonate rear body and a transparent polycarbonate lens, the light emitting diode being viewed through the lens.

Electrical connections are made to terminals mounted in the enclosure rear body.
